

CAMBRIDGE IGCSE

Business 0264

About the Preparation Course

Examinations 2027, 2028 and 2029

Your preparation pathway

The Polymath preparation pathway connects subject understanding with the ability to use it in Cambridge assessments. For Business 0264, this means secure coverage of all six syllabus areas and steady development of the response skills described above.

Stage	What it is for	Expected learner outcome
Course Orientation	Explains the subject, syllabus, assessment and resources	Understand the course and the correct qualification route
Diagnostic Assessment	Identifies starting strengths and gaps through the released diagnostic materials	Know which foundations need attention; no official grade prediction
Syllabus teaching modules	Develops the content and skills in the syllabus map	Understand and connect the required subject areas
Topic and skills practice	Provides opportunities to apply learning and use correction guidance	Address weaknesses before relying on timed work
Paper-specific preparation	Explains the formats and demands of required components	Respond appropriately to the actual assessment tasks
Revision and examination preparation	Brings topics and skills together under increasing time constraints	Improve consistency, accuracy and examination readiness
Examination-entry information	Directs learners to an approved centre for applicable arrangements	Understand that registration and entry confirmation are separate from course study

This is the planned learning sequence, not a statement that every stage or service is already available online. Your released course materials identify the items you can currently use. A preparation-course completion record is separate from a Cambridge qualification.

Starting at the right level

Diagnostic guidance helps identify what you already understand and what needs strengthening. This qualification is typically studied by learners aged 14 to 16, although it may be taken at any age. You do not need to have studied Business before starting the course. Cambridge recommends a broad lower-secondary education or an equivalent foundation, but this is guidance rather than a compulsory entry condition. A diagnostic result should therefore be used to prioritise study, not to label your ability permanently or predict an official Cambridge result.

Learning through the modules

The modules should connect explanations with business cases, financial and operational data, worked calculations and model analytical responses. Topic practice, model approaches and correction guidance then help you see how knowledge is used. Paper-specific preparation brings those skills together in the format required by the qualification.

Build a compact record of concepts, calculations and examples. Use the same case to understand how marketing, people, operations and finance interact, while keeping answers focused on the question asked.

Set a manageable study rhythm that allows time for learning, application and revision. Guided learning hours are broad curriculum-planning measures, not a guarantee that every learner will finish in a fixed number of months. Progress depends on your starting point and the quality of your independent study.

Support and responsibility

The support described here is the structured content, diagnostic guidance, model approaches and examination-preparation material in the course plan. Personal tutoring, individual human marking, live support, automated readiness predictions and examination-registration services are not promised unless separately confirmed in the published course offer.

Keep your notes organised around the syllabus and use corrections to identify recurring gaps. A definition establishes knowledge, but an applied answer uses the business's circumstances. Analysis explains a chain of consequences. Evaluation weighs the relevant alternatives and reaches a justified decision. Calculations need interpretation: state what the result means for the business, not only its numerical value. Practise selecting relevant facts from a case and explaining how those facts affect a recommendation.

Working towards your strongest possible result

Strong preparation combines complete coverage of your required topics with accurate terminology, relevant application and regular review. Balance effort across the required components, and use the official assessment guidance to understand what a stronger response demonstrates. The course supports improvement; it cannot guarantee a grade.
